## SUMMARY

---

Backend Developer with strong experience in Java (Spring Boot) and Laravel, specialized in building scalable, secure, and high-performance systems. Experienced in designing RESTful APIs, microservices architectures, and integrating payment systems. Familiar with Docker, Kubernetes, and modern backend best practices. Actively seeking a Junior Backend or Software Engineer role.

## EXPERIENCE

---

### Trainee Backend Developer

Mad Solution Company

Syria

May 2024 - July 2024

- Designed and implemented a secure authentication system using Laravel and JWT.
- Developed a small e-commerce application featuring role-based access control to manage user permissions.
- Documented and tested REST APIs using Postman, ensuring API functionality and adherence to specifications.

### Junior Developer

JCI Latakia (Project Code Trip)

Syria

June 2023 - August 2023

- Contributed to the development of an e-commerce platform using Laravel, focusing on backend logic and database interactions.
- Enhanced code maintainability through modular design and clean code practices.

## EDUCATION

---

### Bachelor's Degree in Software Engineering

Faculty of Informatics

– Latakia University

September 2025 - September 2025

Latakia University

## PROJECTS

---

**Spring Boot Microservices Project** 🌀 Built a microservices-based system using Spring Boot. Implemented service discovery with Eureka Server.

**Graduation Project – Booking Halls System** 🌀 End-to-end booking platform built with Spring Boot and React.

**E-commerce Platform (Laravel)** 🌀 Full-featured online store with authentication, shopping cart, and payment integration.

## SKILLS

---

Java (Spring Boot, Spring Security, Spring Admin), JPA, Hibernate, PostgreSQL, MongoDB, PHP (Laravel, MVC Architecture), RESTful APIs & Microservices Architecture, Docker, Kubernetes, CI/CD Pipelines, Git (GitHub, GitLab), Authentication & Authorization (JWT, Sanctum), Payment Integration (Stripe, PayPal), Caching (Redis, In-Memory Cache), Clean Architecture, SOLID Principles, Event-Driven Architecture (EDA), Kafka, Eureka Server, Logging (Log4j2, SLF4J, Splunk), Postman (API Documentation & Testing), React, Angular, Thymeleaf, Blade Templates, HTML5, CSS3, Bootstrap, JavaScript, Filament, Ajax, Scalability, Problem solving, Communication, Teamwork

## CERTIFICATIONS

---

**Web Design Certificate** \ [Techno Home Academy](#)

**Training Certificate** \ [Mad Solution Company](#)

**Participation Certificate** \ [JCI Latakia \(Project Code Trip\)](#)
